Benchmarking

Access Barringtons Benchmarking Service and identify the strengths and weaknesses in your practice giving you opportunities to build on your strengths and address your weaknesses.

Let's meet over coffee and discuss how Barringtons medical accountants can help you drive your practice forward.

Specialist Services for GP Practices

GPs in practice have an increasing responsibility to develop their business skills and many realise they need specialist support and advice in order to maintain income and profit levels. Barringtons provide a wide range of support services specifically for GPs to assist with this development and monitoring.

Some of the specialist services that you can access:

- Completion of annual accounts (in best practice format), management accounts, tax returns, and superannuation certificates
- Annual statistical comparisons both nationally and regionally
- Support for GMS and PMS practices of all sizes
- Annual meeting with all partners and management to explain accounts and to develop future financial strategies
- Support to Practice Managers including use and development of software packages and processes
- Payroll bureau to enable clients to outsource payroll and ensure full Real Time compliance and preparation for Auto Enrolment
- Tax planning for individuals and practices, including VAT planning
- Profit and cash forecasting to help with partners' drawings planning and practice budgeting and funding
- Practice business advice to include maximisation of profits
- Assisting practices and new partners re planning and implementation of partnership changes and agreements. We can also assist with partnership dispute resolution
- Connections with other medical sector professionals re legal, banking, financial services and property
- Advice and assistance to maximise support and opportunities available from the local Federation model
